

SONIA PARKER

WEB DEVELOPER

PROFILE

I have a passion for learning new languages, which I have now started to apply to coding.

Originally from Russia, I completed a double degree in International Economics and Professional Translation. I am continuing my studies in Australia with a Bachelor of Arts (Digital Design) and Web Development Immersive at General Assembly.

Currently I am looking for a Full-Stack Junior Developer role where I can improve my skills and contribute to a team.

CORE SKILLS

- HTML5 | CSS3 | Bootstrap | Sass
- JavaScript | jQuery
- Ruby | Ruby on Rails
- PostgreSQL
- Mongo DB
- Test-Driven Development | RSPEC
- Node JS | Express JS
- React JS
- Adobe Photoshop | Adobe Illustrator
- InVision | Balsamiq

EXPERIENCE (AUSTRALIA)

Web Development Immersive Student

General Assembly | Jun 2018 – present

Project 0: Tic Tac Toe Game (Individual)

This is a classic Tic Toe game, with an option to switch between players and display the result on the screen. The game is built with HTML, CSS, JavaScript and jQuery.

Project 1: Holiday App (Individual)

‘Holiday App’ is a place for people to store their holiday ideas and kickstart their travel planning. I wanted to create a place for saving my ideas, nice photos and locations for my

future travels. The app was built using Ruby on Rails on the back-end with PostgreSQL as a database, Bootstrap 4 as Front-End Framework, Bcrypt for authorization/authentication, Google Maps API and Heroku as deployment service.

Project 2: Ink Space (Group Project)

'Ink Space' is a place for freelance tattoo artists to display their creations, specify the time of their visit to Sydney and welcome eager customers. As a client, you can preview artist's work and make a booking. For fun, you can sketch your own tattoo and save it to your computer. Built with Ruby on Rails, PostgreSQL and deployed on Heroku. It uses Cloudinary for image upload, P5.js for animations and Geocoder for dynamic maps display. Styling includes Seamless Grid.

Project 3: Taste of Russia (Final Project)

'Taste of Russia' is a tour agency specializing on exclusive tours to Russia. On the back-end I'm using Ruby on Rails, on the front-end - Bootstrap, PostgreSQL as DB, Heroku for deployment. The largest part of my project was Test-Driven Development using RSpec. I also implemented Credit Card Payment processing using Stripe, as well as displaying current temperature info for each city via AJAX and OpenWeather API. The Image on homepage and floral pattern background were created by me in Adobe Illustrator.

Unit Leader

Richmond Girl Guides | Jul 2015 – present

- preparing and holding weekly meetings
- organising camps, outings, fundraising events
- maintaining the finances for the unit
- work on personal development of members

Polling Place Official

Australian Electoral Commission | Jul 2016
